HILL CO., LTD

VIETNAM'S LEADING INNOVATOR IN FRUIT AND VEGETABLE PRODUCTION

Founded in 2008, Hillco is a leading producer, processor, and exporter of fruits and vegetables in Vietnam. We specialize in both fresh and frozen products, delivering superior quality to customers worldwide.

As a pioneer in integrated agriculture in Vietnam, Hillco is committed to innovation and quality enhancement. We are dedicated to building a strong value chain by fostering close partnerships with local cooperatives, ensuring sustainable growth and delivering superior products.

WHY CHOOSE US?

Our extensive distribution network spans key markets including the United States, the Middle East, China, Japan, and South Korea.

Hillco operates as an information hub for Vietnamese agriculture, providing insights on various fruits, vegetables, and spices in Vietnam.

100% FRESH AND DELICIOUS

TRANSPARENCY FOR SAFE AGRICULTURAL PRODUCTS

Specializing in both fresh and frozen products, Hillco relentlessly pursues innovation and superior quality to deliver exceptional value to customers around the globe.

We manage pesticide residue levels (MRL) through collaboration with farmer groups and local cooperatives in Vietnam. Hillco is also a Vietnamese agricultural export company with strong capabilities in contract-based production and processing.

Fresh Produce Delivered Weekly

We offer a wide variety of export-quality fresh fruits, carefully selected from high-quality growing regions across Vietnam.

PRODUCT'S PORTFOLIO

Frozen Durian Meat

Frozen durian is processed by treating and freezing ripe durian using the most advanced technologies such as IQF (Individual Quick Freezing), which helps preserve its original flavor and nutrients. The product meets year-round consumption demand.

CHARACTERISTICS

- Origin: Vietnam
- Harvest Season: 2025
- Variety: MONTHON (Thai variety)
- Product Type: Frozen at -35°C or lower
- Ingredients: 100% Durian
- Packaging: 450g x 12 pieces / carton (5.4kg)

GROWING REGION

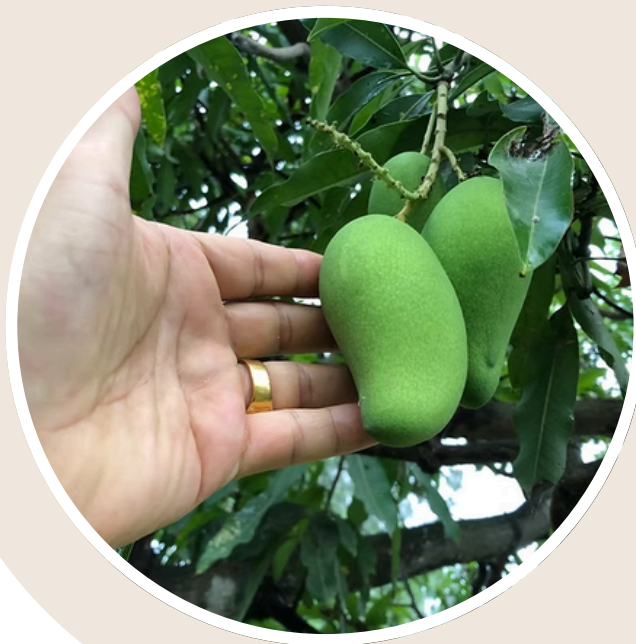

Durian is mainly grown in regions with suitable climate and soil conditions, particularly in Đắk Lắk Province.

Keo Mango

Keo mango is highly favored for its outstanding qualities: green skin, vibrant yellow flesh, firm texture, naturally sweet taste, and low fiber content. This variety is especially well-suited for export due to its excellent shelf life and transportability. Keo mango plays a significant role in Vietnam's mango export industry, with an annual export value exceeding 250 million USD.

CHARACTERISTICS

- Origin: Vietnam
- Harvest Season: 2025
- Variety: MONTHON (Thai variety)
- Product Type: Frozen at -35°C or lower
- Ingredients: 100% Durian
- Packaging: 450g x 12 pieces / carton (5.4kg)

GROWING REGION

Grown in the Mekong Delta region of Vietnam, primarily in An Giang, Đồng Tháp, and Kiên Giang.

Frozen Bananas

Cavendish bananas can be harvested year-round, but the main harvest season typically occurs during the rainy months from May to October. Each banana plant produces only one bunch per growing cycle, but multiple plants can be cultivated to ensure a continuous and stable harvest.

CHARACTERISTICS

- Variety: Cavendish Banana
- Length: 15–25 cm
- Diameter: 30–40 mm
- Packaging: Vacuum-packed: 1kg x 10 packs per carton
- Shelf Life: 24 months at -18°C
- Main Production Areas: Tây Ninh, Bình Dương, Đồng Nai, Vũng Tàu, Cần Thơ, and Bình Phước

GROWING REGION

Primary Growing Environment:
Central Highlands of Vietnam
(800–1000 meters above sea level)

Passion Fruit

Vietnamese passion fruit is distinguished by its pleasantly tangy taste, mild fragrance, and high nutritional content. The fruit features either purple or yellow skin with juicy pulp rich in vitamin C, antioxidants, and minerals. It is cultivated in compliance with GlobalG.A.P standards, meeting the strict requirements of markets such as Europe, China, South Korea, and the Middle East.

CHARACTERISTICS

- Freezing Process: -18°C
- Color: Natural yellow
- MRL (Maximum Residue Limits): No detectable SO_2 , CO_2 , or GMOs
- Shipping Documents: Invoice, Packing List, Bill of Lading (B/L), Phytosanitary Certificate, Certificate of Origin (C/O)
- Packaging: 12–14 pieces per vacuum bag / 1kg x 10 bags per carton
- Shelf Life: 36 months from the production date

GROWING REGION

North (Ninh Binh):

Central Region (Gia Lai, Đắk Lắk): March to June

South (Ben Tre): January to May

VEGETABLES !

Fresh Produce Delivered Weekly

We offer a wide variety of export-quality fresh fruits, carefully selected from high-quality growing regions across Vietnam.

PRODUCT'S PORTFOLIO

Cabbage

Cavendish bananas can be harvested year-round, but the main harvest season typically occurs during the rainy months from May to October. Each banana plant produces only one bunch per growing cycle, but multiple plants can be cultivated to ensure a continuous and stable harvest.

CHARACTERISTICS

- Appearance: Soft leaves ranging from light green to bright yellow
- Shape: Oval-shaped leaves, tightly wrapped
- Texture: Thin, crisp leaves with a mildly sweet flavor, non-bitter, and easy to cook

GROWING REGION

Northern provinces of Vietnam such as Lào Cai, Sapa, Mộc Châu, and Hòa Bình, where the climate is cool and temperate.

Sweet Potato

GROWING REGION

Widely cultivated across the country, including in Vĩnh Long, Đắk Lắk, the Central Highlands, and the Mekong Delta.

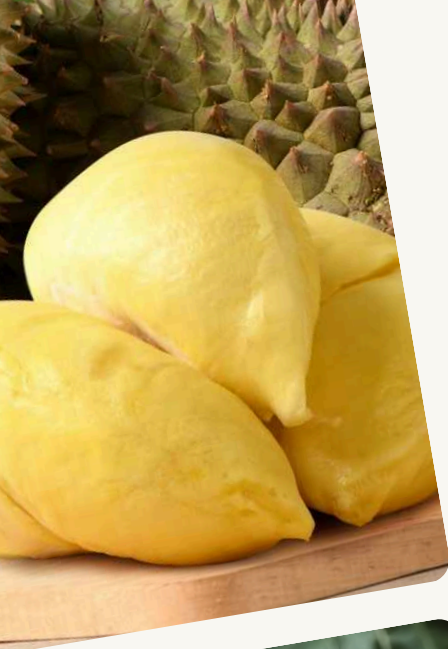

Vietnamese sweet potatoes are exported to various markets, including Japan, China, and Southeast Asian countries. A notable example is Dalat Food Processing Company, which exports around 3,000 tons of sweet potatoes to Japan annually, with export prices reaching over 50,000 VND per kilogram.

CHARACTERISTICS

- Process: Steamed and then frozen
- Color: Natural color
- Standards: Free from SO₂, CO₂, and GMOs
- Shipping Documents: Invoice, Packing List, Bill of Lading (B/L), Phytosanitary Certificate, Certificate of Origin (C/O)
- Packaging: 30kg (inner plastic bag and outer jute sack)
- Expiry Date: 18 months from the production date
